

The tabletop sterilization system that keeps getting better!

The Anprolene Classic Series sterilizers are the latest versions of the system that healthcare facilities around the world have trusted for more than 40 years.

Anprolene Classic Series

Anprolene AN74i and AN74ix

CYCLE MONITORING

The Anprolene system has always offered **the most gentle 100% EtO sterilization cycle** on the market: **room temperature** sterilization (minimum 68° F), **no steam** injection, no deep vacuum, and **only 17.5 grams of gas**.

ACTIVE AERATION

This is the **most affordable** and versatile low temperature sterilizer available!

FREE OPERATOR TRAINING

Anprolene sterilizers now feature a number of important improvements. They include: more powerful ventilation and **purge pumps**, unique **active aeration system**, digital display **tracks cycle progress**, temperature sensor **monitors** and alerts of low temperature in the room. Microprocessor monitors each cycle and displays error messages and cycle progress from start to unload sterilizer.

OPTIONAL ABATOR

Anprolene AN74i

Suggested use:
Small footprint model is well suited for most instruments.

Chamber dimensions:
19.25"L x 13.75"W x 12.75"H

Anprolene AN74ix

Suggested use:
General use, endoscopes, long instruments.

Chamber dimensions:
29.25"L x 13.75"W x 12.75"H

STERILIZER IS INCLUDED WITH A STARTER KIT :

Starter Kit - All you need for 32 cycles!

- 2 boxes Dosimeter chemical indicators / **AN87**
- 2 boxes EtO exposure indicator strips - chemical indicators / **AN85**
- 2 boxes Steritest biological indicators / **AN80**
- 1 kit AirScan test kit (STEL and TWA) / **AN93**
- 1 unit Installation Kit / **AN74.01**

Unique Load Size Flexibility: The Anprolene system uses unique plastic sterilization liner bags and individual gas ampoules. We offer two different bag/ampoule combinations to match the size of your sterilization load. You never use more gas than you need.

Sterilization and Aeration in the same cabinet: The Anprolene System utilizes an advanced purge system that aerates products for two hours at the end of the cycle. Active aeration continues indefinitely until the cycle is ended and products are removed.

Free Operator Training for the Life of the Sterilizer: We recommend that all the operators take our Anprolene Key Operator Training course. Call to receive our study guide. When you are ready contact Andersen Customer Service to schedule a 20 minute test via telephone.

Proven Reliability: Anprolene is used in more than 5,000 facilities worldwide. Find out how an Anprolene sterilizer can improve your practice today. Call 800-524-3455.

Specifications: AN74i

Model AN74.64
 Interior dimensions: 19.25"(L) x 13.75"(W) x 12.75"(H)
 Exterior dimensions: 21"(L) x 14"(W) x 20.5"(H)
 Total weight: 50.5 lbs.
 Power Supply: 115v +/- 10%, 60 Hz/150 Watts
 Installation Category II
 Manufactured by: Andersen Sterilizers, Inc.
 Distributed by: Andersen Products, Inc.

Specifications: AN74ix

Model AN74.84
 Interior dimensions: 29.25"(L) x 13.75"(W) x 12.75"(H)
 Exterior dimensions: 30.50"(L) x 14"(W) x 20.5"(H)
 Total weight: 60.5 lbs.
 Power Supply: 115v +/- 10%, 60 Hz/150 Watts
 Installation Category II
