

The high capacity Anprolene option

The Anprolene Professional Series was created for facilities that use their sterilizer intensively. The AN74J features all stainless steel construction for durability. The Jumbo offers our deepest cabinet for longer instruments, and a wider door (17") for larger flexible scopes that cannot be coiled tightly.

Anprolene AN74j

CYCLE MONITORING

Large animal veterinarians asked us for this unit, and it is now a favorite among zoos, aquariums and equine practices

ACTIVE AERATION

The Professional Series still offers the most gentle **100% EtO sterilization** cycle on the market: **room temperature** sterilization (minimum 68° F), no steam injection, no deep vacuum, and **only 17.5 grams of gas**.

FREE OPERATOR TRAINING

This is **the most robust and versatile low temperature sterilizer** available!

OPTIONAL ABATOR

Anprolene sterilizers now feature a number of important improvements. They include: more powerful ventilation and **purge pumps**, unique **active aeration** system, digital display **tracks cycle progress**, temperature sensor **monitors room conditions** during each cycle, microprocessor monitors cycle and automatically **restores system** in case of power failure.

AN74j and Starter Kit

Suggested use:
High capacity use, large instruments, large veterinarian practices

Chamber dimensions:
29.25"L x 18"W x 12.5"H

Starter Kit - All you need for 32 cycles!

- 2 cases 17.5 g ampoules and sterilization liner bags / **AN7916**
- 2 pouches Humidichip relative humidity stabilizer chips / **AN1071**
- 1 unit Humiditube holder / **AN1072**
- 2 boxes Dosimeter chemical indicators / **AN87**
- 2 boxes EtO exposure indicator strips - chemical indicators / **AN85**
- 2 boxes Steritest biological indicators / **AN80**
- 1 kit AirScan test kit (STEL and TWA) / **AN93**
- 1 unit Installation Kit / **AN74.01**

STERILIZER MUST BE PURCHASED WITH A STARTER KIT

Features and Specifications

Unique Load Size Flexibility: The Anprolene system uses unique plastic sterilization liner bags and individual gas ampoules. We offer two different bag/ampoule combinations to match the size of your sterilization load. You never use more gas than you need.

Sterilization and Aeration in the same cabinet: The Anprolene System utilizes an advanced purge system that aerates products for two hours at the end of the cycle. Active aeration continues indefinitely until the cycle is ended and products are removed.

Free Operator Training for the Life of the Sterilizer: We recommend that all the operators take our Anprolene Key Operator Training course. Call to receive our study guide. When you are ready contact Andersen Customer Service to schedule a 20 minute test via telephone.

Proven Reliability: Anprolene is used in more than 5,000 facilities worldwide. Find out how an Anprolene sterilizer can improve your practice today. Call 800-524-3455.
